

## About Us

DS UK is one of the north of England's leading driver-training consultancies. It was established in 2000 by Paul Murphy with the aim of providing the highest standard of fleet driver training for the fleet client market. As a company we have a no-nonsense approach to road safety. It is your RESPONSIBILITY as a company manager to make sure you are up to date with the HSE Health & Safety legislation driver requirements. DS UK Driver Training Consultants will train all drivers from cars to vans or goods vehicles (up to 750 ton).

All drivers will benefit from a comprehensive fleet risk assessment, which can simply highlight any fault drivers can pick up over many years of driving.

Are trainers will take the skills drivers already have and simply improve them to a higher and safer standard or more advanced level. We are not here to teach them to drive.

All DS UK trainers are minimum DSA & ADI fleet registrations trainer with many years of experience.
